Education

University of Washington, Seattle

Sociology & Informatics, CLASS OF 2022

2018 - 2019: Computer Programming I & II

2019 - 2020: Web Programming , Intermediate Data Programming, Technical Foundations (R)

2020 - 2021: Data Structures and Algorithms, Database Systems

Projects

SupyBlog

A full stack blog web application with user flow and other general blog functionality. Using Flask Web framework and a SQL database to persist user and blog data.

Guitar Simulation

Created a computer keyboard playable guitar with object oriented programming, utilizing the Karplus-Strong Algorithm to replicate accurate pitches, pluck vs pick sounds, and frequencies (Java).

Kobe Bryant

Measured Kobe Bryant's effectiveness on the Los Angeles Lakers using raw statistics. Data analysis and visualization conducted utilizing sklearn and matplotlib (Python).

Experience

Leda Health - Software Engineer Analyst

July 2020 - Oct 2020, New York (Remote)

Developed map of SANE Nurse. Worked on conversation bot for communication with survivors. Designed architecture for anonymous community application for IOS and Android platforms.

Student Technology Loan Program - Assistant

July 2019 - Present, University of Washington

Facilitate equipment reservation requests using an online reservation system. Familiarization of satellite office locations and differences in equipment stock.

Audio Visual Lights Team - Media Director

September 2017 - Present, Seattle Onnuri Church

Volunteer to manage multiple channel sound systems to provide optimal sound for various bands, solving various technical problems.

Computer Skills

OOP. Java. Python. R. HTML/CSS. JavaScript. Web Development. SQL.
