Experience

Bridge
Software Engineer
Intern
Remote
Jan 2023 - Aug 2023

- Streamlined Docker image building by integrating depot.dev, reducing build times and enhancing development efficiency.
- Engineered a dynamic user impersonation feature, leveraging FastAPI to enable administrators to assume different user roles for comprehensive testing.
- Implemented high-fidelity UI designs on the frontend ensuring smooth user interactions

Leda Health
Software Engineer
Intern
New York (Remote)
July 2020 - Oct 2020

- Developed a map based tool in Python to help victims find Sexual Assault Nurse Examiners by location.
- Implemented the conversation bot logic for communication between survivors and aid.
- Designed the UX using Figma for an anonymous community application for IOS and Android platforms.

Student Technology Loan Program
Seattle, WA
July 2019 - August 2023

- Facilitate equipment reservation requests using an online reservation system.
- Familiarization of satellite office locations and differences in equipment stock.

Projects

Planting
Next.js,
TypeScript,
Stripe,
Prisma,
PostgreSQL,
Vercel

- Built and deployed a full-stack donation platform using Next.js and Stripe Checkout.
- Implemented secure Stripe webhooks to persist payment events to a PostgreSQL database via Prisma
- Deployed an admin dashboard for viewing and managing real-time donations.
- Deployed production infrastructure using Vercel with Supabase-hosted PostgreSQL.

Saigon Deli
Gatsby (React)

- Developed a website for a local restaurant using the Gatsby framework and deployed using Netlify.
- Implemented Google Sheets API to allow the restaurant owner to update the menu via Google Sheets.
- Integrated Stripe's payment API to build a secure, end-to-end online ordering system.

Education

University of Washington
Graduated August 2023

Major: Computer Science (BS)

Skills

Python
Java
C++/C

SQL
Git
TypeScript

HTML/CSS
JavaScript
React
